

Bedrock Data Projected Yearly Cash Flow - Available-Cash Payout With Miner Lifecycle Reserve

Based on Ed's May 27 update: 300 Whatsminer M50 per box, 1.1 MW cap per box, 95% uptime, \$36/PH/day, generator reserve at \$0.005/kWh, miner repair reserve at \$7/miner/month, miner fleet replacement reserve at \$16.67/miner/month, and payout limited to cash left after operating costs and reserves.

Payout logic: Equipment reimbursement is limited to cash left after gas, setup purchases, SG&A, generator maintenance reserve, miner repair reserve, and miner fleet replacement reserve. Shortfalls are tracked against the target payout schedule.

Pool/software to confirm: If the \$36/PH/day revenue is already net of pool fee, remove the Pool Fee line to avoid double counting. Confirm what software or service the 2% Software Fee covers.

Lifecycle reserve: Miner replacement reserve is a working assumption based on a \$600 M50 recovered over 36 months. This is separate from miner repair reserve and should be adjusted once ownership/reserve treatment is agreed.
